“Dataweigh Omega”™ NOW ON SALE

- Yamato's new, innovative and worldwide leading multihead weigher -

The next generation multihead weigher, the Dataweigh Omega, will inherit the same features that have made the Sigma Series so successful, plus offer additional improvements.

■ Higher Productivity

Dataweigh Omega series boasts and advanced weighing system to realize high-speed and high-accuracy weighing.

High-speed weighing at a rate of **200 weighments per minute** with 14-head double shift operation, far faster than other models and competitors, contributes to higher productivity by increasing product output per unit of time. This improvement in productivity can enable a reduction in the number of production lines, such as from 2 lines to 1 line, reducing the capital investment needed, space requirements and labor costs.

■ Usability

With the **Auto Tuning Function**, all the operator needs to do is input the speed and target weight and press the START button. Operation is automatically optimized to match the product. Production runs can be easily changed, an important advantage for small-batch, multi-variety production. The various settings are optimally controlled to suit each product, from feeding to discharging. This ensures consistently optimized production.

■ Food safety

Today, with increasing importance being placed on sanitation, Yamato helps to ensure safer food handling to maintain consumer trust. The streamlined main body prevents contaminants such as dust and dirt as much as possible by reducing the irregularities on the surface. The **IP67-compliant** body can be washed perfectly to eliminate accumulated product particles and prevent the growth of bacteria. It's ideally suited for the strict hygiene controls required by the food industry. In addition the feedback control of feeder amplitude brings **60% reduction of power consumption** in comparison with conventional model.

Yamato's Dataweigh Omega Series offers outstanding performance, advanced functions, and high efficiency to increase both productivity and profits while providing consumers with safe, highly reliable products.

Dataweigh Ω™

Event schedule in 2012

Come and see our products

Thank you for your continuous interest of Yamato Scale. We look forward to seeing you at the forthcoming exhibitions.

*Please confirm the exhibition to be exhibited of the "Dataweigh Omega"™ series beforehand.
